## 20 Area of a triangle

```
#include <stdio.h >

int main() {

    int area, hight, length;

    printf("Enter hight, length: ");

    scanf("%d, %d" &hight, &length);

    area = (hight * length) / 2;

    printf("Area = %d\n", area);

    return 0;

}
```

The screenshot shows a window titled "Output" with a "Clear" button in the top right corner. The output text is as follows:

```
Enter hight, length: 24, 5
Area = 60

=== Code Execution Successful ===
```

There is a small red square icon on the left side of the output window.
